APPENDIX No. 5 MONITORING GPS SYSTEM ONI®

1. General provision

All competition rally cars are required to be equipped with the ONI® tracking system during the rally. The ONI® tracking system is the property of Autoklub ČR; the competitors get it for a flat rate fee of **100 CZK/€ 4/unit and 300 CZK/€ 12/unit's holder** if not already fitted in the car. The return of the unit is guaranteed by depositing the driver's rally licence or **1000 CZK/€ 40** at the GPS system administrator. This guarantee is to be given back or paid back at the return of the unit. The competitor is to pay for any eventual destruction, non-return or damage to the unit to the provider pursuant to the approved price list. If not, the driver's licence or the money deposit is not to be returned.

2. ONI® tracking system distribution

ONI® tracking system requires every car to be fitted with an entire tracking unit's holder before the rally. The holder includes:

- tracking unit bracket including cables and mounting accessories,
- 2 aerials (roof and inner ones),
- controls such as:
 - alarm cancel button / call for help / red flag confirmation
 - yellow LED indicator / to indicate red flag

Foreign competitors and other drivers starting sporadically are provided with the entire disposable holder just before the event. Each of these crews must pick up this holder in the area at scrutineering time control at least 30 minutes before time for scrutineering.

After the arrival at the area before the technical scrutineering, the unit administrator checks the holder assembly, installs the tracking unit and tests the tracking system.

At the end of the rally or after DNF, the tracking unit is to be (eventually the entire tracking system) given back to the system administrator. The units dismount is usually carried out at the service parking site before the rally's finish line.

3. The entire holder assembly in the car

3.1 The competitors are required to follow strictly the installation manual of the manufacturer (NAM system, a.s.) while assembling the tracking unit holder, roof and inner aerials, and individual controls; to keep the unit in a good condition for the entire time; to protect it from damage and fouling/dirt (especially the connectors).

3.2 The unit for foreigners and drivers starting sporadically at the rally is equipped with the magnetic roof aerial and the controls which are all placed in one common box. The competitor is to choose an appropriate place to fit the unit on within the reach of both crew members; and to prepare potentialities for its fitting.

4. The unit operation during the rally

To operate the unit, the crews are to meet all instructions mentioned in the user's manual issued by the manufacturer (NAM system, a.s.).

The procedure in individual events at SS:

- Accident (crash detection)
 - alarm is set off immediately, the siren sounds/beeps in the car
 - if no help is necessary, alarm and siren are silenced by pressing the button for a short time (1 sec)
- Stop (more than 30 sec)
 - siren sets off after 30 sec
 - if no help is necessary, alarm and siren are silenced by pressing the button for a short time (1 sec)
 - alarm can be off immediately after the stop by pressing the button for a short time
- Request for help
 - in cases when any immediate help at SS is necessary (i.e. at health hazard, etc.)
 - Call for help is activated by pressing the button for a long time (3 sec) – the siren sets off
- RED flag
 - in case the red flag is hung out at SS, the rally management sends an impulse for the selected crews to light up the yellow LED installed in the visual field of the crew. To confirm the red flag reception, the crew presses the button for a short time (1sec). The yellow LED is off.

• **Warning: if the alarm is not cancelled, it is considered as the request for help!!!**

5. Speed limit check during the reconnaissance

During the reconnaissance, crew must follow the traffic rules of Czech republic. Breaking the rules and mainly exceeding the speed limits will be monitored by GPS system ONI® System. This control doesn't exclude another monitoring by Police of Czech republic including their standard penalties.

GPS system ONI®

System is checking the speed of crew on-line in every time of reconnaissance.

Each crew must pick up the unit of ONI® System together with roadbook. Caution for this unit will be rally licence or 1 000,- CZK. This caution will be forwarded after finish of reconnaissance to the provider of ONI® System for units used for normal rally.

Installation this unit for checking the speed, its connection and using during reconnaissance is mandatory for all crews for whole length of reconnaissance according to art. 3 Reconnaissance schedule.

For checking the speed during reconnaissance will be used units NCL 21.

It is not necessary to connect the unit to any electricity in the car, unit is working on its own battery. It is also possible to put unit in the car to metal surface as there are magnets in the unit.

Not using the unit will be penalised.

Every attempt of cheating, manipulation or adjustment of the unit assigned to the car for reconnaissance or any other device which will make impossible to check/save the data's will be noticed to stewards, which can give penalty up to refusing the start in rally.

Decision about seriousness of the offence and its repeating is in competence of Clerk of the Course. For breaking the rules regarding speed will be given penalties according to art. 20.2 SPR.
