All competition cars have to be obligatorily equipped with the ONI® tracking system. ONI® tracking system is owned by the Autoclub of the Czech Republic and will be rented to the competitors (for non-refundable fee 350 CZK or 15 EUR payable by competitor). Eventual destruction, non-return or damage of the unit has to be paid for by the competitor to the provider in accordance with the applicable price list. In case of non-returning GPS tracking system immediately after the event, the fine 150 euro will be imposed to the competitor.

2. Distribution of the ONI® tracking system

ONI® tracking system contains following parts:

- tracking unit holder
- power supply cable
- combined antenna roof
- control panel containing:
 - OK button to cancel the alarm / confirm red flag
 - SOS switch for calling emergency

ONI® tracking system will be installed to every rally car before each event. Detailed information will be published no later than during road books issuing.

After arrival to the scrutineering, device administrator will install the tracking unit, antenna and control panel. Antenna and power supply cables can be purchased by the crew for personal ownership.

At the end of the rally or after retirement, the tracking unit or complete tracking system must be returned to the device administrator. Usually the devices are collected in the last service area or before finish of the rally.

4. The unit operation during rally

To operate the unit, the crews have to meet all instructions as mentioned in the User's guide.

Operation during events on SS:

• Accident (crash detection)

- The unit evaluates the situation and sends info about accident to rally control. Crew cannot affect this message.

- If the crew pushes **OK** button, this information is sent to rally control and information about accident is not sent to the unit of following cars in the stage.

• Stop in SS

- When the car stops in SS, it is counted as an obstacle. Unit signals to the crew by sound siren and text, that they have stopped. This signal takes 15 s.

- If the crew doesn't push OK, warning message is sent to the rally control and also to other cars, which are currently in the stage arriving to the obstacle.

- With pushing the OK button the crew confirms that they are okay, on the display is shown message OK and information about obstacle is not send to the unit of next cars in the stage.

Every crew will pick up the ONI® recce tracking unit together with roadbook. Installation of the unit and its using during reconnaissance is obligatory for all crews during the whole schedule of reconnaissance according to the art. 3 Reconnaissance schedule. For speed checking during the reconnaissance, NCL 21 units are used.

It is possible to place the unit on metal surfaces - magnets are implemented in the unit.

Not using the unit in a rally car during reconnaissance will be fined.

Every attempt to falsify, manipulate or infringe the unit for reconnaissance or any device, which will make impossible to collect data because of external interference will be reported to the stewards who can penalize the crew up to refusing the start.
