Concept of the start:

Every event is composed from three rounds. Winner is a driver with lower counts of time including penalization based on rounds minus the worst achieved result.

The first three rounds will be counted into the CEZ Slalom Trophy. The worst round is not counted.

The start to each slalom event in the Czech Republic is flying and the driver must obey the instructions from organizer. Further, the driver must start up to 20 seconds from the wave of organizer.

Interval between each start is always specifying in Supplementary Regulations. The start will be given by an electronic countdown system, counting down by seconds and clearly visible to the crew from the start position and electronically coupled to a start line detection device that records any situation where a car leaves the start line ahead of the correct signal.

This start line detection device is 40 cm after the start line in the height of 50 (+/- 5 cm).

The car must be placed in such a way that its foremost part is on the level of the start line.

In case of late arrival to start caused by driver, a marshal of stand records new time and the driver is punished by each beginning minute by 10 seconds. The maximum time for delay is 10 minutes. After that time, the driver is excluded.

Early start is punished by penalization of 20 seconds. However, this penalization does not mean the maximum as the bigger penalization might be assigned by the Steward especially in case of repeating.

Finish of slalom is flying, stopping between finish and table STOP is forbidden and it is punished by exclusion. Counting time on the finishing line must be providing by the device with printing.

Finish will be marked by the red table.

At the distance of 30 - 100 m behind the finish the driver must stop at checking marked by red table STOP.

STOP will be marked by red table.

Driver, who is not able to leave up to 20 seconds after start, will be pushed away to release the area for counting time and will be excluded. The counting of time is carried out with precision on thousandth of seconds. In case of reaching the same time, the quicker round of the compared time is dominant.
